A. Administrative Questions > A_consent_cg						
note_consent1_cg	Consent: My name is [enumerator_name_cg]. I work with Innovations for Poverty Action, a non-profit research group focused on improving the well-being of people around the world. In Liberia, IPA and the Population Council are working together to learn about the well-being and safety of teenage girls in 84 communities in Nimba County. I would like to invite you to participate in a research study aimed at learning how we can improve the situation for girls in this area. First, I will describe the important things you need to know about participating, and then ask you if you will agree to it by signing this form once you feel like you understand. You will get to keep a copy signed by me. If you agree then we will talk to you in private for approximately 30 – 45 minutes. No one will know the answers you give during this interview.					
note_consent2_cg	Benefits, Risks and Confidentiality: Participation is entirely voluntary, and there is no penalty for not participating. There are no direct benefits or risks if you participate, although we hope that the information you share will help us improve the situation for girls in Nimba County. During the interview, if you feel uncomfortable answering any questions you can refuse to answer it or end the interview at any time with no penalty to you or anyone in this household. One risk that we want you to consider is that mistakes can sometimes happen and we lose some information, meaning that something you say can accidentally provide information to others. However, we will take all the necessary precautions to prevent this by keeping the answers private. No person in any community will have access to the information, unless you are observed to be in extreme danger of immediate harm. In such cases, IPA may be mandated to report the situation in accordance with Liberian law. Otherwise, your answers will be kept a secret and only available to the people running this study. The information we use to find you in the future will be kept separate from her answers to questions, and we will use a secret code for you that means no one will know how you answered the questions.					
note_consent3_cg	Additional Information: The ethical review committees of the University of Liberia in Monrovia and of the Population Council in the USA have approved this study. Our team will address any complaint about the way you have been treated during the study or any possible harm you might have suffered. You can contact any of these people at any time with complaints: [ENUMERATOR: PLEASE POINT AT THE PHONE NUMBERS ON THE CONSENT FORM AS YOU READ OUT THESE NAMES] <ul style="list-style-type: none"> G.
