

## Revision to Riyadh Mobility Pre-Analysis Plan

In response to feedback from the enumeration team, we have reworded one of the gender attitude questions in the follow-up survey. The updated wording (changed on September 28, 2021) will capture attitudes towards changes occurring in Saudi society as a whole. Use of this question in analysis will remain consistent with our original pre-analysis plan.

### **Original question:**

“For the following statement, please rate your level of agreement or disagreement”

*I think the gov is working enough/working fast enough to make changes to give women the same rights as men.”*

Response options: “Completely disagree”, “Somewhat disagree”, “Neither agree nor disagree”, “Somewhat agree”, “Completely agree”

### **Updated wording:**

“Some people agree with [Statement A] while others agree with [Statement B]. Which do you agree with most?”

*Statement A: I think the pace of social changes that Saudi society has been witnessing is fast enough to give women the same rights as men and doesn't need to move faster.*

*Statement B: I prefer to see faster changes in Saudi society to give women the same rights as men.”*

Response options: “Completely agree with Statement A”, “Mostly agree with Statement A”, “Neutral between Statement A and Statement B”, “Mostly agree with Statement B”, “Completely agree with Statement A”, “Refuse to answer”.
